Detailed Journey

1. Open Service Catalog: The requester enters the ServiceNow catalog and selects the Car Rental Request item.
2. Enter rental details: The requester enters Requested Date, Pickup Location, Drop Location, Duration, Car Type and Reason.
3. Submit request: ServiceNow creates the Requested Item (RITM) for the submitted catalog request.
4. Approval: The automated flow sends the Requested Item for approval.
5. Approval condition: The flow checks the approval result. When the condition is satisfied, the fulfillment branch continues.
6. Create fulfillment task: A Catalog Task is created and assigned to the configured ITSM Engineering group.
7. Notification: The configured Send Email action runs after the fulfillment step.
8. Track completion: The requester and authorized ServiceNow users can review the request and related task records.

Date	23 September 2026				
Team ID					
Project Name	Car Rental Request Automation in ServiceNow Using Service Catalog and Workflows				
Maximum Marks	4 Marks				
Journey Stage	Steps	Interactions / Touchpoints	Goals & Motivations	Positive Moments	Negative Moments / Opportunities
Entice	Become aware of the car rental service	ServiceNow Service Catalog / portal; request catalog item	Help me understand how to request a car.	Clear service entry point.	User may not know which catalog item to select. Opportunity: provide a clear catalog item name and description.
Enter	Open Car Rental Request and enter details	Catalog form; Requested Date; Pickup Location; Drop Location; Duration; Car Type; Reason	Help me provide all rental details correctly.	All required rental information is captured in one request.	Too many or unclear fields can cause confusion. Opportunity: use clear labels and appropriate field types.
Engage	Submit request and wait for approval	ServiceNow Requested Item (RITM); approval workflow	Help me know that my request was submitted and is being reviewed.	Automated approval process reduces manual follow-up.	Approval waiting time can be unclear. Opportunity: provide clear approval status.
Engage	Approval decision and fulfillment task creation	Approver; Flow Designer; Catalog Task; ITSM Engineering	Help me get the approved rental request processed.	Approved requests automatically create a fulfillment task.	If approval is rejected, fulfillment does not proceed. Opportunity: provide clear status/reason information.
Exit	Receive notification and fulfillment begins	Email notification; Catalog Task; ServiceNow records	Help me know what happens after approval.	Automation connects approval directly to fulfillment.	Users may not know the next action. Opportunity: make notification content clear.

Journey Stage	Steps	Interactions / Touchpoints	Goals & Motivations	Positive Moments	Negative Moments / Opportunities
Extend	Track request and future interactions	Requested Item and Catalog Task records; ServiceNow portal	Help me check the progress of my rental request.	Request and task records provide traceability.	Limited status visibility may lead to questions. Opportunity: show clear request/task status to the requester.
