

Functional Requirements

Following are the functional requirements of the proposed Car Rental Request Automation solution.

Non-functional Requirements

Following are the non-functional requirements of the proposed solution. The descriptions are limited to characteristics relevant to the ServiceNow implementation.

Implementation scope: The project is a ServiceNow-based workflow automation solution. Therefore, requirements for unrelated technologies such as social login, external payment processing, machine-learning models or external databases are intentionally not included.

Date	_____23 September 2026_____
Team ID	_____
Project Name	Car Rental Request Automation in ServiceNow Using Service Catalog and Workflows
Maximum Marks	4 Marks

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Car Rental Request	Submit a car rental request through the Service Catalog.
		Capture Requested Date, Pickup Location, Drop Location, Duration, Car Type and Reason.
FR-2	Request Approval	Send the Requested Item for approval after catalog submission.
		Continue the flow when the approval condition is satisfied.
FR-3	Catalog Task Fulfillment	Create a Catalog Task for the approved request.
		Assign the task to the configured ITSM Engineering assignment group and include the rental request details.
FR-4	Email Notification	Send an email notification after the approved request reaches the notification step.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	The Service Catalog request form should be simple and understandable so users can enter rental details without unnecessary steps.
NFR-2	Security	Access to catalog requests, approvals, tasks and administrative configuration should be controlled by ServiceNow user roles and permissions.
NFR-3	Reliability	The workflow should consistently create the approval, catalog task and notification steps when the configured conditions are met.
NFR-4	Performance	The request form and automated flow should execute without unnecessary processing or manual intervention.
NFR-5	Availability	The solution is hosted on the ServiceNow platform so the application is accessed through the ServiceNow instance.

NFR No.	Non-Functional Requirement	Description
NFR-6	Scalability	The Service Catalog and Flow Designer approach allows additional request fields, approval steps, fulfillment tasks and notifications to be added as requirements grow.
