

Functional & Performance Testing Template

Date	23 September 2026
Team ID	
Project Name	Car Rental Request Automation in ServiceNow Using Service Catalog and Workflows
Maximum Marks	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Car Rental Request Form Validation	Enter the rental request details and submit the Service Catalog item.	Valid request details are accepted and a Requested Item is created.	RITM00000005 was created and processed.	Pass
FT-02	Approval Workflow	Approve the submitted Requested Item through the configured approval process.	Approval is recorded and the approval branch evaluates as true.	RITM00000005 shows Approved; flow branch evaluated True.	Pass
FT-03	Catalog Task Creation	Complete the approval path and inspect the resulting task.	A Catalog Task is created for fulfillment.	SCTASK0010001 was created; action completed.	Pass
FT-04	Email Notification Generation	Complete the approval path and inspect System Logs → Emails.	An approval email record is generated for the Requested Item.	Email record generated with subject "Your Car Rental Request is approved."	Pass
FT-05	End-to-End Flow	Execute the complete configured flow.	The flow completes all configured actions.	Overall execution state was Completed.	Pass
PT-01	Flow Execution Time	Review the completed Flow Designer execution timing.	The configured flow completes within the observed test execution time.	Completed in approximately 2.266 seconds for the recorded execution.	Pass
PT-02	Action Execution Timing	Review action durations in the completed flow execution.	Each configured action should execute and report a completion duration.	Ask For Approval: 219 ms; approval branch: 2042 ms; Create Catalog Task: 476 ms; Send Email: 1462 ms.	Pass
PT-03	Notification Processing	Review the email log generated by the Send Email action.	The notification record should be created without a workflow execution failure.	Email record was generated; instance outbound email sending was disabled during the test.	Pass

Note: Performance values above are taken from the recorded completed Flow Designer execution for the project. They represent the observed test run and are not a general ServiceNow performance guarantee.
