

User Acceptance Testing (UAT) Template

Date	23 September 2026
Team ID	
Project Name	Car Rental Request Automation in ServiceNow Using Service Catalog and Workflows
Maximum Marks	

Project Overview

The Car Rental Request Automation project provides a ServiceNow Service Catalog request form and an automated workflow for approval, fulfillment task creation and email notification.

Project Version: 1.0

Testing Period: 23 September 2026

Testing Scope: Service Catalog request submission; Requested Item creation; approval processing; Catalog Task creation; email notification; end-to-end Flow Designer execution.

Testing Environment: ServiceNow Developer Instance / Workflow Studio and Service Catalog.

Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Submit Car Rental Request	Open Service Catalog → Car Rental Request → enter Requested Date, Pickup Location, Drop Location, Duration, Car Type and Reason → submit.	A Requested Item is created for the submitted request.	RITM0000005 was created and used in the workflow execution.	Pass
TC-002	Approval Processing	Open the approval/request record for the submitted RITM and process the approval.	The request approval changes to Approved when the approver approves it.	RITM0000005 shows Approval = Approved.	Pass
TC-003	Catalog Task Creation	After approval, inspect the workflow execution and related Catalog Task.	An approved request creates a fulfillment Catalog Task.	SCTASK0010001 was created and the Create Catalog Task action completed.	Pass
TC-004	Email Notification	After the approval path runs, inspect System Logs → Emails for the request.	An approval email record is generated with the expected subject and target.	Email record for RITM0000005 was generated with subject "Your Car Rental Request is approved."	Pass
TC-005	End-to-End Workflow	Run the complete process from request submission through approval and fulfillment notification.	The flow completes the configured sequence without an execution failure.	Flow execution completed: Ask For Approval → If Approved (True) → Create Catalog Task → Send Email.	Pass
TC-006	Invalid / Missing Request Details	Attempt to submit the request without completing required information, where applicable.	The form should prevent submission or require the necessary information.	The project documentation does not contain a recorded negative-test result for this scenario.	Not Tested

Bug Tracking

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Outbound email sending was disabled in the instance during the tested execution.	Check the email sending property and execute the Send Email action.	Low	Observed / Configuration dependent	The email record was generated successfully; actual outbound sending depends on the instance email configuration.

Sign-off

Tester Name: Vempali Sampath Kumar

Date: 23 September 2026

Signature: _____

Notes: Positive end-to-end execution was verified. A negative test case remains marked Not Tested where the supplied project evidence does not provide a recorded result.
